Technical Skills

Frontend Technologies:

React 18, TypeScript, Redux
Toolkit, MUI, Next.js,
JavaScript, HTML5,CSS.

Backend Technologies:

Python, FastAPI,
SQLAlchemy, REST APIs,
GraphQL, Node.js,
RabbitMQ

Databases: PostgreSQL,
MySQL, Redis.

DevOps & CI/CD: Git,
GitHub Actions, Docker,
CI/CD Pipelines, Linux, AWS
(Lambda, S3, RDS, IAM).

Methodologies: System
Design, Code Reviews,
Performance Optimization,

Software Engineer with 5+ years of experience building scalable web applications using React.js, TypeScript, and Python (FastAPI). Delivered a 40%+ application performance improvement at Analytic Edge through frontend optimization and backend query tuning. Proven Expertise in CI/CD pipelines, REST APIs, PostgreSQL, Docker, and AWS cloud services. Experienced in writing automated tests using Pytest and Jest. Experienced in mentoring junior developers and driving end-to-end feature delivery in Agile teams.

Work history

2022-02 - Current	Software Engineer Analytic Edge, Bengaluru - Developed full-stack applications using React and Python FastAPI for enterprise analytics platforms. - Integrated LangChain and RAG pipelines using ChromaDB to build an internal document search feature, reducing manual lookup time by approximately 60%. - Improved application performance by over 40% through frontend optimization and backend query tuning. - Implemented CI/CD pipelines using GitHub Actions and Docker, deploying containerized services to AWS (EC2/S3) with zero-downtime releases. - Mentored three junior developers through structured code reviews and pair programming sessions, reducing onboarding time by two weeks. - Designed a Redis caching layer, reducing database load by approximately 30% and improving API response times. - Wrote automated backend tests using Pytest and frontend tests using Jest, maintaining 80%+ test coverage across critical API endpoints.
2020-09 - 2022-02	Associate Software Engineer Infinite Computer Solutions, Bengaluru Developed a React.js frontend for enterprise clients serving 10,000+ users, building reusable

Distributed Systems Design.

AI/LLM: LangChain, LangGraph, LLM APIs (OpenAI), RAG Pipelines, Vector Databases (ChromaDB/Pinecone)

Testing: Pytest, Jest.

component libraries that cut UI development time by approximately 25%.

- Collaborated with backend engineers to integrate Python and Node.js APIs, supporting 5+ enterprise product modules across 2 client accounts.
- Implemented JWT authentication and optimized SQL queries, reducing average API response time by approximately 20% across core endpoints.

Education

2020-05

Bachelor of Engineering: Computer Science And Engineering

Karpagam College of Engineering - Coimbatore, TamilNadu
